N° of key for the ignition and anti-theft device _____

N° of key for the glove compartment _____

This card must not be removed from the guide

Extracts from the general condition of sale.

ART. VII – FREE 600 MILE INSPECTION* – After having covered the first 600 miles, the buyer must have his vehicle serviced. This service will be carried out, free of charge, in the workshops of the manufacturer or at one of its dealers or official agents, who may or may not be the seller.

This service is certified by an attestation attached to the guarantee card (see art. VIII) by the CITROEN dealer who has carried out the service.

ART. VIII – GUARANTEE – The vehicles are guaranteed by the manufacturer for a period of six months from the date of invoice.

A guarantee card is remitted to the buyer on delivery of the vehicle. This card made valid by the attestation of the dealer who carried out the 600 mile Service, is necessary for any claims under the guarantee.

The guarantee granted by the manufacturer, such as is defined below, distinctly limits his responsibility.

- 1^o The guarantee includes, at the descretion of the manufacturer, the repair or exchange of parts which have been found to be faulty, and likewise the labour necessary for this repair or exchange.
- 2^o The work to be carried out under the guarantee must be carried out by a member of the manufacturer's network.

- 3^o The parts being claimed for under the guarantee must be sent back to the factory for inspection.
- 4^o The exchange or repair of parts under guarantee will not in anyway prolong the duration of the guarantee.
- 5^o The guarantee does not cover the cost of towing nor the costs due to the immobilisation of the vehicle. Neither does it cover the consequences of normal wear of the vehicle, nor the usual checks and adjustments.
- 6^o The guarantee is refused and the manufacturer is freed from all responsibility :
 - a) When parts fitted by the manufacturer have been replaced by parts of a different origin.
 - b) Where damage is due to negligence, incorrect use of the vehicle, overloading, even for a short time, or the inexperience of the driver.

* This service is free of charge ; only the cost of new oil necessary for :

- changing the engine and gearbox oil
- topping up the hydraulic system,

as well as the cost of a new engine-oil filter cartridge and its seal, will be charged to you.

Maintenance guide.

By following the recommendations contained in this maintenance guide and confiding your vehicle to a workshop in the CITROËN network, you are thus assured of the best quality at the most reasonable price.

At the indicated mileage, we invite you to go along to the CITROËN network who will perform all the operations provided for in this maintenance guide.

After the car has been handed over by your CITROËN dealer, consult your owner's manual.

You will find:

- all the characteristics of your car;
- precise indications on checking uses;
- recommendations for the use and maintenance.

Genuine replacement parts.

Only those genuine Replacement Parts sold by CITROËN NETWORK have been checked as rigorously as the parts used when assembling new vehicles.

Always ask for the genuine mark on all your invoices.

It is there for your safety.

If adaptable parts are used instead of the original ones you will have no assurance of quality, and will also run the risk of losing the benefit of the guarantee.

Additional documentation:

You can, if you wish:

- Consult our price-list.
- Obtain a replacement parts catalogue, as well as a repair manual for your vehicle from members of our network (but these are really meant for mechanics rather than customers).

Guarantee and the 600 mile inspection.

Your car has the benefit of the guarantee covering parts and labour for a period of six months, regardless of the mileage covered.

The guarantee does not include the replacement of the parts which wear in normal use, such as tyres, brake linings and pads, electric bulbs, sparking plugs, contact-breaker points ...

On presentation of this guide, any service station of the CITROËN network will carry out an inspection of your vehicle when it has covered approximately 600 miles (1.000 km).

The supply of oil and materials are not included in this free service, neither is the engine-oil filter cartridge and its seal.

This inspection is obligatory for retaining the right of the guarantee.

Citroën network all over the world.

IN FRANCE, there are 11 Regional Directions which comprises more than 5.000 Branches, Concessionnaires and Dealers, at your disposal.

THROUGHOUT THE WORLD, there are 22 Subsidiaries, and more than 4.000 Dealers and Service Stations, which are also at your disposal.

A brochure "FRANCE and EUROPE Network" lists the places where you can find a CITROËN Service in Europe.

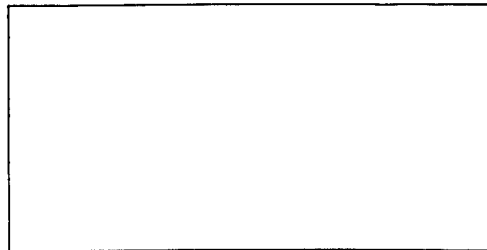

You can obtain one of these brochures, and all the relevant information concerning the CITROËN network in the countries throughout the world where it is represented, at the following address:

Société des AUTOMOBILES CITROËN
SERVICES A LA CLIENTELE

very cold countries:
TOTAL GTS 10W/30 or
TOTAL altigrade **GT 10W/30**
Special Motorway

Gearbox Oil:

TOTAL extreme pressure
SAE 80 (4 and 5 speed
gearbox)

TOTAL ATF 33
(Borg Warner gearbox)

Suspension fluid:
Small articulating:
points

TOTAL LHM
TOTAL small articulating
points

General greasing:

TOTAL MULTIS

Anti-freeze liquid:

TOTAL ANTI-FREEZE

CITROËN 

Lubricants and fuels.

We strongly advise against the use of all oil additives of any kind, either for the engine or gearbox, during and after the guarantee period.

All mixtures and experiments with fluids is forbidden; particularly the use of any type of oil additives, as this could lead you to serious trouble.

Checks.

Before starting out on a long journey, we advise you to carry out the controls in the pre-start check list on the back page of your owner's manual. YOUR SAFETY DEPENDS ON IT.

To obtain the best use from your vehicle, we request that you have the SERVICE operations carried out by a member of our CITROËN Network, in preference your dealer, at the mileages indicated. If the annual mileage is low the lubrication of the vehicle and draining of the engine should be carried out at least once a year.

Furthermore, we advise you to have your vehicle inspected every 6.000 miles or at least once a year by our ELECTRONIC CONTROL STATIONS. This diagnosis will allow for determining with your receiving dealer, the urgency, and necessity of any eventual interventions.

Nevertheless, we propose the WORKSHOP MAINTENANCE operations, which, if carried out at the periods indicated, guarantee the best validity for your vehicle.

Electronic Checks.

Operations recommended every 6.000 Mls (10.000 Km)

CHECK THE IGNITION AND CHARGING CIRCUIT.

CHECK THE FUEL SUPPLY SYSTEM.

CHECK THE ELECTRICAL INSTALLATIONS.

CHECK THE BRAKES.

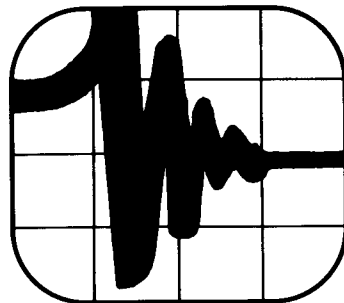

CHECK THE TYRES.

CHECK THE HEIGHT CLEARANCES.

CHECK THE FRONT AXLE ASSEMBLY.
